Professional Summary

- Electronics and Communication Engineering student with hands-on experience building web applications, Python bots, and embedded projects, backed by 600+ solved LeetCode problems in C++. Strong foundation in data structures, algorithms, and object-oriented programming. Seeking opportunities to contribute to innovative software projects.

Education

- **Haldia Institute of Technology** — Haldia, West Bengal, India
  B.Tech in Electronics and Communication Engineering; CGPA: 8.6/10 — *Expected 2028*

Projects

- **Sudoku Pro – Interactive Sudoku Solver** — Live Demo | GitHub
  - **Tech Stack:** HTML, CSS, JavaScript, GitHub Pages
  - **Project Abstract:** A browser-based Sudoku solver that solves user-entered puzzles using a backtracking algorithm. Includes four difficulty levels, a limited hint system, move counter, timer, keyboard navigation, and light/dark theme; deployed as a responsive web app.
- **CWC Daily Discharge Data Sheet** — GitHub
  - **Tech Stack:** HTML, CSS, JavaScript
  - **Project Abstract:** An offline-first web tool to record river discharge gauging data: station details, gauge readings, cross-section velocity table, and computed salient data. Supports local saving, JSON import/export, full backup, and a print-ready 2-page PDF export, all from a single HTML file with no backend.
- **Personal Portfolio Website** — GitHub
  - **Tech Stack:** HTML, CSS, JavaScript
  - **Project Abstract:** A personal portfolio website showcasing projects and skills, with a downloadable resume.
- **DSA Visualizer** — Live Demo | GitHub
  - **Tech Stack:** HTML, CSS, JavaScript, DOM Manipulation
  - **Project Abstract:** An interactive sorting visualizer that animates Bubble Sort and Selection Sort in real time on randomly generated arrays, rendering each algorithm step to help learners understand how sorting works.
- **Student Management System** — GitHub
  - **Tech Stack:** C++, Object-Oriented Programming
  - **Project Abstract:** A C++ application built with object-oriented principles to add, search, delete, and display student records.
- **Telegram Coupon Bot**
  - **Tech Stack:** Python, python-telegram-bot
  - **Project Abstract:** A multi-category coupon Telegram bot with an admin panel and a user wallet system.
- **Electronics Projects**
  - **Tech Stack:** Embedded and Analog Design
  - **Project Abstract:** Built a WiFi-based smart appliance controller with power status feedback for remote control of appliances, and an LM386-based audio amplifier circuit.

Achievements

- **Solved 600+ problems on LeetCode**, practicing in C++ across arrays, strings, linked lists, stacks, queues, trees, graphs, sorting, and searching.

Technical Skills

- **Programming Languages:** C++, JavaScript, Python, SQL (basics)
- **Web Development:** HTML, CSS, JavaScript, DOM Manipulation
- **Developer Tools:** Git, GitHub, GitHub Pages, VS Code
- **Areas of Expertise:** Data Structures and Algorithms, Object-Oriented Programming, Problem-Solving
